

Egress

Bedroom Window Egress

The second exit required in a bedroom is usually a window. The dimensions of the openings are to assure the residents an escape route, but equally important, they are designed to allow a firefighter with a n airpack to enter. This opening must be a min. of 24" high and 20" wide min. The window sill must not be higher than 44" from the floor.

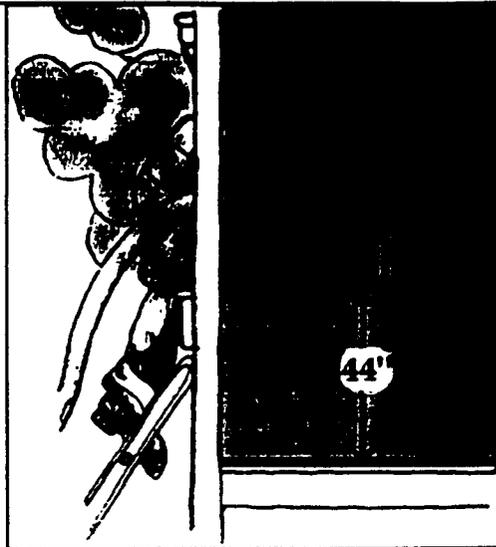

fig.b11

- Emergency escape to public way.
- 5.7sq.ft. opening min.
- Window opening 20in. min. width & 24in. min. height
- Security bars must have escape hardware
- Keyless exiting & hardware <48in. above floor
